Add your content using `reStructuredText` syntax. See the reStructuredText documentation for details.

CONFIGURATIONS

Nginx

Reverse Proxy Configuration

```
map $status $header_content_type_options {
    204 "";
    default "nosniff";
}

server {
    listen 80;
    listen [::]:80;

    server_name activcount.ca www.activcount.ca;
    root /var/www/activcount/system/nginx-root; # Used for acme.sh
SSL verification (https://acme.sh)

    location / {
        proxy_set_header X-Forwarded-For $proxy_add_x_forwarded_for;
        proxy_set_header X-Forwarded-Proto $scheme;
        proxy_set_header X-Real-IP $remote_addr;
        proxy_set_header Host $http_host;
        proxy_pass http://127.0.0.1:2368;

        add_header X-Content-Type-Options
$header_content_type_options;
    }

    location ~ /.well-known {
        allow all;
    }

    client_max_body_size 50m;
}
```

> **ⓘ Note**
>
> This configuration is for a reverse proxy setup with Nginx, which forwards requests to the Ghost CMS instance running on port 2368. The *X-Content-Type-Options* header is set to *nosniff* to prevent MIME type sniffing, enhancing security.

Ensure that the server name matches your domain and that the root directory is set correctly.

Ghost CMS

Ensure that the server name matches your domain and that the root directory is set correctly.

FREQUENTLY USED COMMANDS

```
# To specify the Node.js versionto use for Ghost CMS
nvm use 20.11.1
```

Created using Sphinx 8.2.3.
